## RESEARCH INTERESTS

I aim to advance statistical learning theory to build reliable, interpretable models for complex data, focusing on:

- **AI for Science (AI4S)**
  - *Large-scale Data Analytics, Predictive Modeling, Deep Learning Applications.*
- **Biostatistics and Medical Statistics**
  - *DNA Data Storage, Neuroimaging Analysis, Survival Analysis.*
- **Statistical Learning & Inference**
  - *Optimization for Statistical Learning, Causal Inference, Semiparametric Modeling.*

## RESEARCH EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                         |

## HONORS & AWARDS

|                                                                                                         |      |
|---------------------------------------------------------------------------------------------------------|------|
| • <b>China Undergraduate Mathematical Contest in Modeling (CUMCM) - Second Prize (Provincial Level)</b> | 2025 |
| • <b>Mathematical Contest in Modeling (MCM) - Honorable Mention</b>                                     | 2025 |

## SKILLS

**Languages:** Chinese Mandarin (Native), English (CET6 - 523)

**Technical Skills:** Proficient in coding: Python,  $\LaTeX$ , R; Interested mathematical derivations; Solid foundation in mathematics and statistics.

**Teamwork:** Technical communication, Collaborative research.
